

# Email Encryption

## Don't take privacy for granted...

Send confidential emails with confidence, using CipherPost Pro™ email encryption service. With CipherPost Pro, your message remains encrypted all the way to the recipient. You control who sees your messages, and the patented delivery slip will show you when the message is received and opened. CipherPost Pro truly has brought next-generation encryption to your business today.

## Encryption made easy.

CipherPost Pro also ensures protection of confidential information and helps maintain regulatory compliance, such as HIPAA regulations and other privacy standards. It integrates with existing technology investments, is easily accessible through any browser and has dedicated apps for all popular devices, including iOS, Android, BlackBerry and Windows phone. And now CipherPost Pro supports secure e-signatures, an available feature that provides unprecedented security and convenience when dealing with secure documents.

## No more excuses.

Considering that CipherPost Pro Requires minimal overhead, eliminates message or key storage and has the lowest volume of helpdesk calls in the industry, you can't go wrong with our free, 30-day trial. Best of all, there's no hardware or software to manage and you can cancel anytime for any reason. What are you waiting for?
